Institute for Health Metrics and Evaluation at the University of Washington has a model.

It assumes stay-at-home orders in every state in the next week.

Forecasting COVID-19 impact on hospital bed-days, ICU-days, ventilator days and dea...
Assuming social distancing measures are maintained, what are the forecasted gaps in available health service resources and number of deaths from the COVID-19 pandemic for each state in the United Sta...

<http://www.healthdata.org/research-article/forecasting-covid-19-impact-hospital-bed-days-icu...>

You can look up each state:

IHME | COVID-19 Projections

Explore hospital bed use, need for intensive care beds, and ventilator use due to COVID-19 based on projected deaths

This model predicts the maximum deaths per day.

Florida: 136 on May 3.

Minnesota: 49 on Apr 19.

South Carolina: 30 on Apr 26.

We'll see.

Context:

Garrett M. Graff ✓
@vermontgmg

Governor Cuomo says 332 COVID-19 deaths in the last 24 hours in New York, a big leap. That means last Friday, a New Yorker was dying every ten minutes. Yesterday, it was every six minutes. Today, it's down to every four minutes. Every. Four. Minutes.

I agree with this Carl T. Bergstrom thread that the Institute for Health Metrics and Evaluation at University of Washington model is too optimistic. It assumes social distancing is practiced and it is flawed by being based on fatalities so far.

So the story tonight in Minneapolis, (perhaps because I follow many journalists) is media getting shot with rubber bullets, gassed, and arrested as they get between protesters

and police. (Many media were terrified of the mayhem without police presence the last two nights).

Law enforcement seem to not understand protocol around ignoring media. Media seem to be confident that they can go wherever they want because of their press credentials. I think
